Explanation

The individual issuing department, bureau, office, or agency is considered the publisher of Government publications.

Words and figures enclosed in brackets [ ] are given for information, but do not appear on the title pages of the publications cataloged. Place and printer are not given for publications printed at the United States Government Printing Office, Washington, D.C. Size is not given for octavo publications. Size of maps is approximate, measurement being made from outer edge of border, excluding margin. The dates given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays.

The word "processed" as used in this catalog indicates publications which are reproduced by duplicating processes other than ordinary printing, e.g., mimeograph, multigraph, planograph, rotaprint, multilith. Processed publications are not obtainable from the Superintendent of Documents. Requests for them, if they are available, should be addressed to the issuing office or to the Office of Technical Services, as indicated by the distribution symbol.

Under provisions of the Printing Act of January 12, 1895, all Government publications are entered in the Monthly Catalog. However, administrative and confidential (or restricted) publications are omitted.

The L.C. card number appended to some of the entries is for those libraries ordering printed cards from the Library of Congress. The number at the extreme right of an entry indicates the classification of the publication in the Office of the Superintendent of Documents.

General Information

The Superintendent of Documents, Government Printing Office, Washington, D.C., is authorized by law to sell copies of Government publications and to allow a discount of 25 percent to book dealers and also to quantity purchasers of 100 or more copies of a single publication on condition that they will adhere to the public sales price set by the Superintendent of Documents and that publications shall not be overprinted with any advertising matter.

Publications cannot be supplied free to individuals nor forwarded in advance of payment.

PRICE LIST

There is no general price list of public documents, but numerous lists have been prepared on special subjects and any of these will be furnished free, on application, by subject or subjects concerning which information is desired. It will also be noted that current publications which are for sale are listed in this catalog.

LIST OF SELECTED PUBLICATIONS

In addition to the price lists, the Documents Office issues a biweekly list of Selected United States Government publications for sale by the Superintendent of Documents. Each list is arranged alphabetically by subjects, with annotations and prices, and may be obtained free upon application to the Superintendent of Documents.

CONGRESSIONAL BILLS, DOCUMENTS, AND REPORTS

More than 12,000 different bills are usually introduced during a Congress, and there are additional prints on many during the progress of the legislation. With the exception of a very few—such as revenue bills—the demand is an unknown quantity and on most of them we receive no orders, which makes it impossible to print a sales supply. It may be that a copy could be obtained from your Congressman.

A difficult problem is also presented in providing a supply of congressional documents, hearings, and reports because there are approximately 6,000 of this class of publications issued during a Congress and only a few of them are called for. We will attempt to print for sale a few of the more important ones, but if not priced the only possible source would be from your Congressman.

HOW TO ORDER PUBLICATIONS

Publications entered in this catalog that are for sale by the Superintendent of Documents are indicated by an asterisk (*) preceding the price. Those for sale by the Office of Technical Services, Commerce Department, are indicated by a farad (Φ) preceding the price. A black dot (●) indicates that the publication has been or will be sent to depository libraries. A dagger (†) indicates that application should be made to the department, bureau, or agency issuing the document. A double dagger (‡) indicates that the document is printed for official use and is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary, it will be found under the name of the bureau by which it was published.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing department, bureau, or agency, and the title, together with the classification number which is added to the entry at the extreme right; order the congressional documents and reports by the title, together with the document or report number and the Congress, e.g., H. doc. 108, 82d Congress.

Do not use the L.C. card number in ordering a publication from the Superintendent of Documents.

HOW TO REMIT

Remittances for documents marked with an asterisk (*) should be made to the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C., by coupon, postal money order, express order, or check. Publications cannot be mailed in advance of receipt of remittance. Currency may be sent at sender's risk. Foreign remittances should be made either by international money order or draft on an American bank.

Foreign money, defaced or smooth coins, will not be accepted. Do not send postage stamps.

For the convenience of the general public, coupons in the denomination of 5c that are good until used in exchange for Government publications sold by the Superintendent of Documents, may be purchased from this office. Address order to Superintendent of Documents, Government Printing Office, Washington 25, D.C.

Persons who make frequent purchases from the Superintendent of Documents may find a deposit account convenient. Deposits of $25.00 or more are accepted against which orders may be placed without making individual remittances or first obtaining quotations. Order blanks are furnished for this purpose. After the handling of the order has been completed, it will be returned showing the publications supplied, explanations regarding those not sent, the amount of charge, and the balance on deposit.

No charge is made for postage on documents forwarded to points in United States and possessions, or to Canada, Cuba, Mexico, Newfoundland (including Labrador), and certain Central and South American countries. To other countries the regular rate of postage is charged, and remittances must cover such postage. In computing foreign postage, add one-fourth of the price of the publication.

LIBRARY CLASSIFICATION IN DOCUMENTS OFFICE

The classification given at the right of entries for departmental publications is that used in the Library of the Division of Public Documents. It is also used as a catalog number for sales stock of this office. The shilling mark (/) separates what would ordinarily be superior or inferior numbers or letters, as it is not practicable to print these numbers or letters as superiors or inferiors in the Monthly Catalog.

6796 Military specifications. D 1.12:

NOTE.—These specifications are now so completely covered by the Military Index, volumes 2, 3, and 4, published by the Army, the Navy, and the Air Force, semi-annually and kept current by cumulative supplements, that listing in the Monthly Catalog of United States Government Publications represents unnecessary and wasteful duplication of effort. For that reason they will no longer be listed.

Complete information on the three indexes of specifications will be found in the November 1959 Monthly Catalog under Entry number 17129, in the January 1960 Monthly Catalog under Entry number 160, and in the February 1960 Monthly Catalog under Entry numbers 1460, 2412, and 3169.

Air inlets (aircraft):
aerodynamic and flow-field characteristics at free-stream Mach number 3.0 for airplanes with circular fuselage cross sections and 2 engine locations 7405
auxiliary, immersed in turbulent boundary layer, internal performance 7401
conical, operating at free-stream Mach number of 2.5, cooling with water injection in subsonic diffuser 7400
nose, force, moment, and pressure characteristics at Mach number 3.85 7394
nose, normal-shock, lip geometry effects on drag and pressure-recovery 7428
supersonic, compressor stall and buzz characteristics of J 34-spike-inlet combination, investigation 7404
2-dimensional, zero-angle-of-attack performance 7399

Entry

Air inlets (aircraft)—Continued
underslung scoop, mass-flow and pressure-recovery characteristics at free-stream Mach numbers 2.0, 1.8, 1.5, and 0.66, investigation 7402

Aircraft:
control—
acceleration restrictor, flight investigation 7442
longitudinal, dynamics on pilot opinion and response characteristics, effects 7429
longitudinal, low-aspect-radio unswept wing and horizontal tail mounted well above wing plane 7382
planet approach-phase guidance schemes using range, range-rate and angular-rate measurements 7450
power spectral analysis of response quantities of fighter airplane 7458
spoiler-slot-deflector and other spoiler ailerons, aerodynamic load distribution over 45° swept wing 7421
surface, oscillating at high frequency hinge-moment characteristics 7385
surface, oscillating hinge moments and flutter characteristics 7414
controls—
flap-type trailing-edge on trapezoidal wing at Mach numbers 1.61 and 2.01, tabulated pressure data 7413
use during service operational-training with four fighter airplanes 7408
employment outlook 7263
target drones, general procurement information 6794

Wings (aircraft):
aerodynamically heated, multiweb in free jet, tests 7430
complete, aerodynamic characteristics of lateral control system employing rotatable airfoils mounted vertically at wing tips 7387
delta, free-flight roll performance of steady-flow jet-spoiler control of 80° missile between Mach numbers 0.6 and 1.8 7425
flutter, compilation of experimental information 7410

Entry

Wings (aircraft)—Continued
sweptback—
aerodynamic load distribution, with spoiler-slot-deflector and other spoiler ailerons 7421
horizontal fuselage forebody fins effect on directional and longitudinal stability 7420
presure distributions and aerodynamic characteristics of spoiler controls 7441
trapezoidal—
flap-type trailing-edge controls, pressure distributions and aerodynamic loadings at Mach numbers of 1.61 and 2.01 7412
in combination with basic and indented bodies, aerodynamic loading characteristics 7418
pressure data for several flap-type trailing-edge controls at Mach numbers 1.61 and 2.01 7413
triangular—
static longitudinal stability and control characteristics at Mach numbers from 0.70 to 2.22 7386
wing and canard on extended body, static stability and control at Mach numbers of 0.70 to 2.22 7388
wing and unswept canard, static stability and control at Mach numbers from 0.70 to 2.22 7389
triangular and rectangular, pressure distributions to high angles of attack 7384
unswept—
low-aspect ratio, fighter model, with horizontal tail mounted well above wing plane—
lateral and directional stability 7383
longitudinal stability and control 7382
oscillating hinge moments and flutter characteristics of flap type control surface with low aspect ratio at transonic speeds 7414
wing and canard longitudinal characteristics 7390
